NS Industries now offers INCONEL® Alloy 693 Ferrules

- Resistance to Metal Dusting
- Resistance to High Temperature Corrosion

EXCELLENCE RESISTANCE TO METAL DUSTING

NS Industries is happy to add the Inconel 693 alloy to its broad array of offerings. Inconel 693 is a new alloy from Special Metals which offers resistance to high temperature corrosion mechanisms not previously available from a nickel-based alloy. The material allows NS Industries to produce Ferrules from 1.25"OD (31.75mm) to 1.00 OD (25.4mm) with a wall thickness of .065 (1.651mm).

NS Industries also provides Alloy 602CA when producing Ferrules in order to meet any customer need. Call us today at 606.387.4905.

Tubing material made from Inconel Alloy 693

NS Industries superior tubing alloy

Ferrule

INCONEL® Alloy 693 offers the best resistance to metal dusting in chemical and petrochemical processing environments of any conventional alloy currently manufactured.
