

FERRULES IN STOCK

Ferrules/Tube Inserts SA249/316/316L

PROLONG THE LIFE OF YOUR HEAT EXCHANGER TUBE AND REDUCE COSTS

6" long x 0.035 wall flare on inlet end and 15° taper on outlet end

TUBE SIZE INCH	TUBE SIZE MM	FERRULE PART NO.	PRICE
1"OD x 0.110Mw	25.4OD x 2.8Mw	75110	\$10.00
1"OD x 0.085Mw	25.4OD x 2.15Mw	80085	\$10.00
1"OD x 0.065Mw	25.4OD x 1.6Mw	85065	\$10.00
3/4"OD x 0.110Mw	19.05OD x 2.8Mw	51110*	\$10.00
3/4"OD x .085Mw	19.05OD x 2.15Mw	55085	\$10.00
3/4"OD x .065Mw	19.05OD x 1.6Mw	61065	\$10.00

*wall thickness 0.020 304SS

- Non-standard sizes and alloys available
- Credit Cards accepted: VISA/MasterCard
- Suitable for roller expansion or full length hydraulic expansion
- Shipped within 24 hours of order ...or less
- Overnight delivery available in most markets.

Extend the service life of your exchanger and reduce costs. The vast majority of heat exchanger tubing failure occurs within the first 2" of the inlet end due to erosion/corrosion. Whether it's a new unit or an existing one, ferrules will prolong the life of the unit. When ferrules start to fail, they can be removed and replaced at significant cost savings versus a complete re-tube of the unit.

Protect heat exchanger tubes from erosion...and save money. Call Harry Brocklehurst today at 606.387.4095.
